Summary

South Korea-based vulnerability researcher specializing in offensive security for IoT devices. Experienced in embedded systems penetration testing, with a strong focus on firmware extraction, vulnerability research, and exploit development.

Education

KITRI Best of the Best **July 2021 – March 2022**
10th, Vulnerability Analysis Track

Experience

STEALIEN Inc. | *Principal Researcher* **Feb 2026 – Present**
Conducted project management, technical reporting and developed an LLM-based automated pipeline for firmware vulnerability analysis.

STEALIEN Inc. | *Senior Researcher* **Sep 2023 – Feb 2026**
Conducted security assessments of embedded systems.

NPCore Inc. | *Malware Analyst* **Nov 2022 – Sep 2023**
Conducted static and dynamic analysis of Windows malware, implemented Windows native API call tracing with Detours, and developed YARA rules for an EDR solution.

Achievements

Pwn2Own Ireland 2024 **Team STEALIEN**
Team Member *Lorex Camera, Ubiquiti AI Bullet*

Certificates

Industrial Engineer Information Processing **2025**
National Technical Qualification Certificate

Craftsman Information Processing **2021**
National Technical Qualification Certificate

Vulnerability Disclosure

CVE: CVE-2026-6250
KVE: KVE-2024-0687
